

BLACKOUT DIFFUSER NOZZLES : - A range of sturdy diffuser style nozzles developed & built predominately for bushfire control. Fitted with a unique floating diffuser which prevents debris induced water stream distortion with minimal rotational turns between jet/spray flow characteristics for ease of gloved hand use. Available in sizes to suit hose reel and layflat use and utilised in a variety of engineered products such as pistol grip nozzles, hi-volume monitor discharge, fixed fire protection deluge and direct coupled plant washdown.
