

HEAVY DUTY SLIP – ON UNITS:

Fire Control Units fitted with equipment suitable for a variety of uses from Bushfire / Townsite fire control to Minesite / Industrial fire protection.

This range of heavy duty portable Slip-on style fire units are manufactured in the traditional way with all operational components, equipment lockers and a BELLGLASS fully baffled fibreglass tank fitted to a heavy duty galvanised steel base frame.

These Units can be manufactured with a great variety of custom made modifications suitable for various vehicle applications and pumpset requirements.

Crane / Forklift removal of the Slip-on allows a 6/7 tonne flat top tray

4 x 4 carrier truck to have alternative utilisation.
