

QUICKFLOW PRIMER PUMPS: -

- Model 1 suits pumps to 40mm discharge
- Model 2 suits pumps to 50mm + discharge

Both primer pumps are manufactured in high strength cast aluminium to take the inevitable hard knocks of fire-fighting operations. Simple, single handed operation and low maintenance is assured with internal diaphragm and self-flushing non-return valves protected by a brass / stainless line filter that minimises water debris blockages. Mounting is direct 4 x bolt to any flat surface / bracket at any angle to the pump.
